

PAUL RODRIGUEZ

Solutions Architect | Sales Engineer | Technical Discovery | AI Workflow Automation

Denver, CO | paul@prodriguez.dev | 312-927-2477 | [LinkedIn](#) | prodriguez.dev

PROFESSIONAL SUMMARY

- Solutions Architect and Sales Engineer with a client-facing background across technical discovery, solution design, demos, integrations, and delivery.
- Strong at translating ambiguous business needs into clear technical direction, usable workflows, and implementation plans teams can actually ship.
- Especially effective in roles that combine enterprise software, stakeholder trust, applied AI workflows, and hands-on technical judgment.

CORE STRENGTHS

- **Solution Architecture & Discovery:** workflow mapping, requirements gathering, solution framing, implementation planning
- **Sales Engineering & Technical Validation:** demos, workshops, stakeholder alignment, technical presentations, buyer trust
- **AI Workflow Automation:** lead qualification, customer intake, CRM hygiene, deal intelligence, document analysis, knowledge systems
- **Platform & Integration Strategy:** APIs, onboarding flows, enterprise SaaS, data handoffs, production delivery

PROFESSIONAL EXPERIENCE

Solutions Architect, Auxo Solutions, New York, NY

OCTOBER 2024 - PRESENT

Lead technical discovery and solution architecture for high-trust financial services and insurance platforms, helping teams turn complex requirements into secure, usable applications.

- Lead solution design and delivery for secure investor onboarding, subscription, and document-heavy financial workflows supporting a global alternative asset management client.
- Architect client-facing systems involving onboarding flows, identity verification, beneficiary setup, funding workflows, document generation, e-signature, and platform integrations.
- Shape public-facing annuity purchase and calculation workflows for a national insurance client, helping make complex investment journeys easier to understand and complete.
- Guide private-fund investor onboarding across 24 fund workflows, including subscription documents, legal review, signing, final packet generation, cloud upload handling, and operational workflow improvements.
- Support technical evaluations and solution validation for enterprise opportunities ranging from \$50K-\$500K ARR.
- Lead discovery sessions with stakeholders, application engineers, and internal teams to turn ambiguous business needs into clear technical direction, constraints, and implementation plans.
- Bridge business, product, and engineering conversations so the plan stays clear enough to sell, build, and defend.

Principal Solutions Architect, Smart Code Shop, Denver, CO

MARCH 2016 - PRESENT

Help small and mid-sized businesses make better technical decisions, improve customer-facing digital workflows, and turn business problems into practical software, automation, and web solutions.

- Advise owners of service-based businesses across construction, roofing, real estate, accounting, and professional services on technology investments that improve lead generation, operational efficiency, customer experience, and scalability.
- Lead discovery engagements to map business goals, operational bottlenecks, customer workflows, and technical constraints into clear execution plans.
- Design and implement workflow automation, CRM, website, and integration solutions that reduce manual processes and support business growth.
- Build AI-assisted workflows for lead qualification, customer intake, proposal generation, document analysis, research, content creation, CRM hygiene, and internal operations.
- Connect AI assistants and automation workflows into business systems, including HubSpot-connected sales workflows for lead management, research, follow-up, and customer visibility.

Senior Frontend Developer, Great Jakes, New York, NY

JULY 2021 - SEPTEMBER 2024

Modernized enterprise SaaS platforms and custom web applications for global law firms, focusing on scalability, reusable architecture, delivery efficiency, and reduced technical debt.

- Re-architected a multi-tenant SaaS platform, improving scalability by 35% and creating a stronger foundation for long-term product growth.
- Helped increase annual project output by upgrading core technologies and building a more effective component-based architecture.
- Reduced technical debt by 30% through code reviews, stronger design patterns, and better engineering standards.
- Mentored a distributed team of 10 engineers, improving code quality, delivery velocity, and team effectiveness.
- Partnered with product, design, and engineering stakeholders to translate platform needs into practical technical plans.

Lead Frontend Web Developer, OneTen Creative (DISH Network), Denver, CO

JULY 2018 – JUNE 2021

Led frontend development and architecture for DISH Network's e-commerce platforms, campaign launches, and high-traffic retail experiences, with a focus on performance, conversion, reusable systems, and launch readiness.

- Led the technical redesign of Black Friday and Cyber Monday e-commerce platforms, contributing to a 164% year-over-year increase in sales.
- Built a custom Shopify component ecosystem that supported a 20% increase in new business acquisitions.
- Engineered and optimized Dynamic Creative Optimization HTML5 banners, increasing conversion rates by 200%.
- Worked across creative, marketing, engineering, and business stakeholders to deliver customer-facing commerce experiences under tight launch timelines.

Senior Web Developer, Designer, Denver Print Company, Denver, CO

NOVEMBER 2014 – MARCH 2016

- Designed, built, and launched custom web solutions for clients, combining frontend development, WordPress implementation, visual design, and client-facing delivery.
- Improved WordPress site performance by 25%, creating a better user experience and stronger client satisfaction.

Senior Web Developer, Designer, Graphik Creative, Denver, CO

MARCH 2012 – JANUARY 2013

- Provided web development and design services for client projects, with a focus on WordPress, e-commerce, and brand-supporting digital experiences.
